

NITHIN GOWDA M S

Python Developer | AI & Machine Learning | Data Analytics

+91 8310790963 | nithingowda381@gmail.com | linkedin.com/in/nithingowdru | Bengaluru, Karnataka

PROFESSIONAL SUMMARY

Artificial Intelligence and Machine Learning graduate with hands-on experience in Machine Learning, Deep Learning, and Computer Vision. Proficient in Python, YOLOv8, OpenCV, Scikit-learn, Pandas and Numpy with experience developing real-world AI solutions. Seeking a Machine Learning Engineer or AI Engineer role to apply technical skills and contribute to innovative projects.

TECHNICAL SKILLS

Programming Language	Python
Python Libraries & Frameworks	Flask, Scikit-learn, OpenCV, YOLOv8, NumPy, Pandas, Matplotlib, Seaborn
Databases	MongoDB, MySQL
Analytics & BI	Microsoft Power BI, Tableau, Excel
Developer Tools	Git, SDLC, Agile

EDUCATION

BE — Artificial Intelligence & Machine Learning	<i>Jan 2022 – May 2026</i>
Vivekananda Institute of Technology, Bengaluru	CGPA: 8.31
Honours in Data Science	<i>Ongoing</i>
Visvesvaraya Technological University, Belgavi	
Pre-University (PCMB)	<i>2022</i>
Sree Ayyappa Education Centre & Composite PU College, Karnataka	Marks: 72

KEY PROJECTS

CamCtrlX — AI-Driven Attendance Management System

Python · Flask · OpenCV · YOLOv8 · SQLite · HTML/CSS

- Built an AI-based CCTV surveillance system that connects with existing DVR and IP camera infrastructure to automate attendance marking, employee monitoring, and security surveillance in real time.
- Developed face recognition and person detection modules to identify employees, track working hours, and detect unauthorized access using computer vision and machine learning techniques.

Agri-Sense — Intelligent Agricultural Decision Support System

Python · Scikit-learn · Flask · Bootstrap · Weather API

- Built an ML-powered Python web app providing crop recommendations based on soil parameters (N, P, K, pH, rainfall) using Scikit-learn classification models.
- Integrated real-time Weather API data and Python-based plant disease image diagnosis; delivered a responsive cross-device interface using Bootstrap.

Grama Yatri — Rural Community Bus Service App (*In Development*) (*Kotlin, Retrofit*)

- Developing a community-focused Android application in Kotlin to streamline rural bus service information, routes, and schedules for underserved communities.
- Designing an intuitive, low-data-usage UI tailored for rural users with limited connectivity, incorporating real-time bus tracking and local language support.

CERTIFICATIONS

- Introduction to Machine Learning — VTU (May 2026)
- Python for Data Science — VTU (May 2026)
- Learning Analytics Tools — VTU (Apr 2026)
- Artificial Intelligence Search Methods for Problem Solving, IIT Madras — VTU (Apr 2026)
- Deep Learning for Computer Vision — VTU (Mar 2026)
- Computer Vision — VTU (Jan 2026)
- Reinforcement Learning — VTU (Jan 2026)
- Data Analytics with Python — VTU (Aug 2025)
- Python (Basics) — HackerRank
- Python Essentials 1 — Cisco Networking Academy
- Data Analysis with Python — IBM & Cognitive Class (Jan 2024)
- Google Cybersecurity (includes Python) — Google (Jan 2024)
- 1 Month Python Internship — OctaNet Services Pvt Ltd. (Mar 2024)
- Python — LetsUpgrade (Jan 2024)
- Python for Beginners — Udemy (Dec 2023)
- Google AI Essentials — Google & Coursera (Aug 2024)
- AI for All — Intel Corporation
